FI180

**Flexible
Easy to Use
Versatile**

Our FL180 floor lift is a stable and flexible floor lift that can be used in all types of lifting situations. It allows for lifting from high surfaces, such as a chair, bed, wheelchair or commode, in addition to lifting from the floor. The FL180 is the perfect solution as a complement to our overhead lift for several lifting situations.

Flexible

The FL180 easily lifts from both low and high surfaces to move a patient from a bed, seated position or even the floor. It works seamlessly with most of our loop slings, allowing it to be used in many different lifting situations. The low floor height ensures it easily fits under most furniture and its portability allows it to easily be moved between different rooms or departments in facilities. It is an optimal solution when overhead lift installations are not possible or planned or for use in corridors. It also offers a versatile temporary solution when a lift is required only for a short period of time or when waiting for a permanent solution.

Easy to Use

The FL180 features LINAK actuators and easy to maneuver wheels, two of which feature a braking system for security when loading or unloading a patient. Its base can be adjusted electronically and it features manual or electric emergency lowering. The display panel clearly indicates battery levels and service requirements.

Quality

Our products are designed and manufactured to meet all the requirements of relevant ISO, UL, IEC and EN standards. At every stage of the development process, every single product is given extensive attention in design, developement and manufacturing. This means that a user of this product feels confident with its reliability and the caregiver feels confident with its safety.

Accessories

Hanger Bars
Comes complete with 50cm/19.7" hanger bar. Optional small (70977) and medium (70978).

Upholstered Cover
Protects user from injury. Not for use in wet environments. Does not work with small (70979). Part no. 50866

Slings
Assorted sizes and models of Human Care slings can be used with this product.

Hand Control
Included with floor lift. Lift arm up/down, leg mast open/closed functions. Replacement Part no. 70974

Lifting Situations

Use to/from a bed
Use to raise/lower a patient from/to a bed.

Use to/from a chair
Use to raise/lower a patient from/to a chair.

Use to/from the floor
Use to raise/lower a patient from the floor.

Use to/from the toilet
Use to raise/lower a patient from/to a toilet.

Features
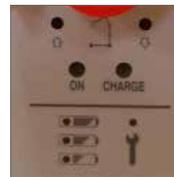

LED indicator
Indicates low battery level and service requirement.

Emergency Stop
Cuts power to lift for emergency situations. Reset by turning counter clockwise.

Emergency Lowering
Manual or electric.

Tested to all relevent standards, including ISO 10535, hoists for the transfer of disabled persons.
